# Fluency Direct

## Seamless Integration with athenaClinicals®

M\*Modal Fluency Direct® enables physicians of any medical specialty to dictate, review, edit and sign clinical notes directly in their athenaClinicals®. A single cloud-hosted speech profile can be used from any device, with any web browser for rapid adoption, greater productivity and improved physician satisfaction.

M\*Modal Fluency Direct enables clinicians to create complete, compliant and timely documentation by dictating in real time. With its embedded Computer-Assisted Physician Documentation (CAPD) functionality, M\*Modal Fluency Direct combines documentation creation and Clinical Documentation Improvement (CDI) into a single, real-time workflow. Moreover, physicians can also:

- Use M\*Modal Speech Understanding™, which is a unique combination of Speech and Natural Language Understanding technologies, to accurately document narrative
- Quickly navigate Tabs and Sections using speech commands
- Define voice-enabled commands to automate frequent tasks and normal text
- Improve quality of care and communication by speeding up documentation availability
- Maximize investment in EHR deployment by providing rich narrative documentation efficiently
- Minimize user-specific activity to train the system
- Experience greater accuracy and overall performance due to the M\*Modal platform's ability to continuously learn and refine its analysis
